Quick settings:

- BlueStacks: Resolution 1280 x 720, DPI 240 and Enable Android Debug Bridge (ADB).
- > Summoners War: English language and Reduced Quality in OFF.

Multi-Instance Configuration Guide:

1. Open the BlueStacks Multi-Instance Manager (Control + Shift + 8), or via the shortcut on the desktop:

2. Click New instance, then Clone Instance:

3. With the instances created, open them and in one of them change the device used in the Advanced tab, this will serve to differentiate which instance you are logging into:

Display	Devi	ce profile
Engine	Devi Blue	ce profile lets you set up a device provisioning profile for your Stacks instance.
Notifications	Chan	ges will delete android framework data
Preferences	0	Choose a predefined profile
User data	~	Samsung Galaxy S10
Advanced	0	Samsung Galaxy S8 Plus
Shortcut keys	Mob	Xperia XZ
Game settings	Setup netwo	mobile network name to allow games that require a mobile ork to function well

4. When you log in to Primmoners you can choose which device you are connecting to, open Primmoners more than once, and connect each one to a different device, if the devices do not appear, wait for about 20 seconds and click the update button , repeat the process if it is not

appear, wait for about 20 seconds and click the update button **S**, repeat the process if it is not enough:
